Title of the Manuscript:	Terbinafine Induced Stevens Johnson Syndrome Toxic Epidermal Necrolysis Overlap Syndrome
Type of the Article	Book Chapter

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(If agreed with the reviewer, correct the manuscript and highlight that part in the manuscript. Authors must write his/her feedback here)</i>
Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	It is important not only for the healthcare professionals but also for the common public to create awareness on Adverse reactions.	t
Is the title of the article suitable? Do you have any alternative Title in your mind?	Yes. Suitable.	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	Yes.	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	Suitable.	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	The introduction, case presentation, treatment and discussions sections are fine. But the causality assessment was not discussed in detail. The association between the drug and the reaction should be given in a Table model. Secondly the number of cases affected worldwide was missing, which can be easily find out from WHO-UMC database.	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	Yes.	

PART 2:
