PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(If agreed with the reviewer, correct the manuscript and highlight that part in the manuscript. Authors must write his/her feedback here)</i>
Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	Yes The prevalence of resistant <i>E. coli</i> is a serious issue which makes the antimicrobial therapy difficult. The characterisation of AMR in bacteria makes the therapy more useful and appropriate, thus can minimise emerging resistance.	
Is the title of the article suitable? Do you have any alternative Title in your mind?	Yes	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	Yes	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	Yes	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	The manuscript is well written and informative. The work was carried out in an excellent manner and effectively adhering to scientific recommendation. There were lot of spacing issues between words (in all sections) & the name of the bacteria should be written in italics (in introduction).	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	YES
