Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	Not really. Only discuss Starfruit, emphasizing renal disease patients. Only 37 pages. A short and simple book. This article would be better if it were structured and formatted more clearly. It would be better to divide it more clearly with subheadings for each component to make it easier for readers to understand and enjoy reading. There is a lack of in-depth analysis of the underlying biochemical mechanisms and the exact pathways through which CBX and oxalic acid produce their toxic effects.	
Is the title of the article suitable? Do you have any alternative Title in your mind?	"CARAMBOLA/FIVE-FINGER: THE FORBIDDEN FRUIT FOR PATIENTS WITH RENAL DISORDERS AND OTHER HEALTH RISKS"	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	There is no abstract. Please make a good abstract	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	Yes	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	The structure needs to be refined such as "Introduction," "Caramboxine Poisoning," "Oxalic Acid Poisoning," and "Clinical Symptoms and Management."etc Please incorporate findings from recent studies to provide an up-to-date understanding of starfruit poisoning. Some repetition in discussing symptoms and recommendations can be revised for a more concise presentation. It depends on the target readers of this book, whether they are lay people or scientists. Example of Carambola / Starfruit / Five fingers cooking recipes, not scientific	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	Proper
