

[Review Form2](#)

Book Name:	Medicine and Medical Research: New Perspectives
Manuscript Number:	Ms_BPR_2512
Title of the Manuscript:	Current Topics in Acute Abdomen: Causes, Diagnostics, and Emerging Therapies
Type of the Article	Book Chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Acute abdominal pain is a significant subject in surgical practice, where we face it every day in surgical emergencies, It is fundamental to have comprehensive knowledge about the etiology, approach, and treatment of the acute abdomen.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract looks suitable, but the keywords look not relevant to the subject (Component, Formatting, Style, Styling, Insert) , I suggest (acute abdomen, laparoscopy, acute appendicitis)	
Are subsections and structure of the manuscript appropriate?	Yes the subsections and structure of the manuscript are appropriate	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The introduction was short, needs to be more comprehensive, and covers all aspects of the subject, The author needs to add nonsurgical causes of the acute abdomen (diabetic ketoacidosis, lobar pneumonia, and herpes zoster), in addition to the result section of the article we didn't have the final results of the review articles regarding comments causes of the acute abdomen or different strategy in treatment, in discussion section, when comparing and contrasting the findings from this paper to those within the literature it would be helpful to also include those studies' e.g., study type, cohort size, follow-up duration, etc., to allow for an adequate and appropriate comparison	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are recent but it is preferred to add more references for such an important subject	

Review Form2
