

[Review Form2](#)

Book Name:	Current Approaches in Engineering Research and Technology
Manuscript Number:	Ms_BPR_2517
Title of the Manuscript:	Numerical study of the vibrations of beams with variable stiffness under impulsive or harmonic loading
Type of the Article	Book Chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The successive approximation approach to beams with changing stiffness. Though a little complicated, the successive approximation method is explained in full. It is a good idea to compare numerical results with analytical answers in order to verify the precision and dependability of new techniques.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	By quickly outlining the significance of analysing beams with changing stiffness, the abstract could more effectively establish the scene.	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The work demonstrates inventive methodology and cautious modification to manage dynamic loadings. The sequential approximation approach for a difficult issue involving beams with varying stiffness is demonstrated in the study.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Please add some recent literatures (4-6)	
Minor REVISION comments	Yes	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	NA

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
