Book Name:	Recent Developments in Chemistry and Biochemistry Research
Manuscript Number:	Ms_BPR_2969
Title of the Manuscript:	TargetSNPdb: a database of preliminary analysis data of the impact of nsSNPs on drug targets, drug-metabolizing enzymes, and disease-associated genes
Type of the Article	Book chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	This manuscript highlights the importance of nsSNP in pharmacokinetic and pharmacodynamics. It assesses the functional impact ofnsSNPwhich can fortify the basis of personalized medicine.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is apt and accurate.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive. However I would suggest naming a few importantnsSNP along with their impact in the abstract.	
Are subsections and structure of the manuscript appropriate?	The subsections and structure is appropriate.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.	Various parameters have been used to assess the association ofdsSNPs and its molecular impact on the drug. Use of various computational tools has been done to assess alleles with statistically significant frequency in the population.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	The references are mostly accurate, though there is slight variation in the reference style.
