

[Review Form2](#)

Book Name:	<u>A Collection of Special Quinary Quintic Diophantine Equations with Integer Solutions</u>
Manuscript Number:	Ms_BPR_2650
Title of the Manuscript:	A Collection of Special Quinary Quintic Diophantine Equations with Integer Solutions
Type of the Article	Complete Book

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	In Cryptography, Security and Key generation is Most important. Diophantine equations are most suitable method to generate Keys. The present Book is having some techniques to generate Keys. So I like this Paper, even through some techniques are already implemented.	
Is the title of the article suitable? (If not please suggest an alternative title)	Suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	List out All collections of Quinary Quintic Equations, which are in this book	
Are subsections and structure of the manuscript appropriate?	Most of the equations are repeated, remove them in Each Chapter	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	In key generation in Cryptosystem, the techniques, which are mentioned in this book are most useful.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Add new Published papers related to this topic	

Review Form2

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>I have read the manuscript under consideration carefully and would like to recommend the following suggestions for publication:</p> <ol style="list-style-type: none"> 1. Worked for in this collection of Quinary Quintic Equations by assuming some limited values of unknowns. My suggestion make it try for generalisation with using of Computer Programming method or trial and error methods. $\alpha(x^4 - y^4) = (c^2 + d^2)(z^2 - w^2)P^3, \alpha > 0$ <ol style="list-style-type: none"> 2. Please write down your aim and objectives of the each and every chapter. Also give organization of the manuscript section wise. <p>Overall there are so many repeated steps of equations and in references add new updated Manuscripts related to this work i.e the selection of published papers is not up to the mark. There is repetition of paragraphs unnecessarily.</p> <p>Suitable for Publications with some revisions</p>	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
