PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The author combined the conventional quantum mechanics and general relativity together and derived the field equation of a particle. Then the author gets some new results. And these new results are very interesting. This is a good idea.	
Is the title of the article suitable? (If not please suggest an alternative title)	yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	yes	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	In currently research of theoretical physics, new idea is very important to develop a new physical theory. Because we don't have a complete theory to unit quantum mechanics and general relativity yet. So the new concepts are needed to get the new unit theory. This manuscript has the scientific value.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	yes
