

BPI Review Form 070520

Book Name:	<u>Advanced Concepts in Medicine and Medical Research</u>
Manuscript Number:	Ms_BP_6702B
Title of the Manuscript:	Clinical Characteristics of Concomitant Systemic Lupus Erythematosus and Primary Biliary Cholangitis
Type of the Article	Book Chapter

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(If agreed with the reviewer, correct the manuscript and highlight that part in the manuscript. Authors must write his/her feedback here)</i>
Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	I appreciate this case as PBC with SLE association is not a very common entity, most of the literature is about Sjogren syndrome with PBC association.	
Is the title of the article suitable? Do you have any alternative Title in your mind?	I think clinical characteristics are not only the focus of this review , also the author has mentioned outcome , the term 'concomitant' is also not correct in this context, a better title is needed. – Association of PBC and SLE – a literature review.	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	A bit detailing in result section is needed	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	The quality of English should be more professional, the author can get help from language experts	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	Different headings are good, but some detailing of clinical association is needed. Any racial variation of clinical characteristics would make the essay more interesting I am surprised that the authors focus only on English and Japanese literature I was not able to see a comparison table which is highly recommended in such review cases	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	References are proper, but I think authors should focus on studies all over the world.	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
