

Editor's Comment:

I confirm that this work's topic fits the scope of the book and can be a contribution. The chapter was improved based on the reviewers' comments. However, I found three many limitations:

- The paper layout is erratic (different letter types and margin sizes).
- Despite the improvements, the English writing is poor, and it should be checked by a native speaker and improved accordingly.
- The reference numbers are not sequential, starting by [1].

When these issues are met, I recommend to accept the chapter.
