

BPI Review Form 070520

Book Name:	Medical Research and Its Applications
Manuscript Number:	Ms_BPR_883
Title of the Manuscript:	Recurrent episodes of ventricular tachycardia in the patient with LV aneurysms, improved after LV aneurysmectomy
Type of the Article	Book chapter

BPI Review Form 070520

PART 1: Review Comments

	Reviewer's comment	Author's comment (If agreed with the reviewer, correct the manuscript and highlight that part in the manuscript. Authors must write his/her feedback here)
Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	YES. The work in the article gave insight about the the ways to correct the recurrent tachycardia in patients who has experienced heart attacks.	
Is the title of the article suitable? Do you have any alternative Title in your mind?	The title needs to be rephrased in such a way to remove comma. "Treatent of recurrent LV tachycardia through LV aneurysmectomy Procedure"	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	The abstract clearly mentioned the treatents the patient has undergone before aneurysmectomy. The procedure of aneurysmectomy and its effect in making the hear rate notmal is not mentioned, that is the result of the work should also be included in the abstract in a brief manner.	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	Yes	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	<ol style="list-style-type: none"> 1) The one of main part missing seems to be details about the patients other conditions. Mentionning of 71 year old women and having history of heart condions were given. Since the mentiong of the patient tolerating the aneurysmectomy shows the patient is healthy except for heart conditions. Providing other health details would be englighteing the readers about whom to perform aneurysmectomy. 2) There is a need for explanation of what kind of aneurysmectomy procedure has been performed in a detailed manner. So that the readers can gain more insight about the reason for the success of the aneurysmectomyin this case. 3) The study apparently links the LV aneurysmectomy with LV tachycardia. The study says tachycardia was solved through surgical procedures as in the Reference papers (4-12) especially as old as Ref.[7].[1993] and Rer.[9]1981. 4) The study finds out that probale reason for aneurisym might be <i>hear attack</i> and <i>tachycaria</i>. As a suggestion an elaborate work can be done on finding the reason and link between <i>heart'sstructure</i>and the <i>electrical pulse generation</i> in the heart. 	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	Kindly add recent journal works. The recent paper in the references was published in 2017. Lots of state of the technologies migh be available. Kindly refine your references.
