Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	This is an interesting review pertaining to aminoglycosides and their uses and potential for future use and drug resistance to them.	
Is the title of the article suitable? Do you have any alternative Title in your mind?	Title is fine.	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	yes	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	yes	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	<p>The first paragraph of the introduction should be split inot more than one paragraph and each section should be expanded upon. Right now it's a very long paragraph that contains several unconnected topics. For example the last sentences about H. pylori do not seem connected to the paragraph and likewise the description of the discovery.</p> <p>After this sentence it would be good to see a figure of this reaction.</p> <p>The process of epimerization occurring at the 3'-position of aminoglycosides holds significantpromise as a fundamental basis for the development of more potent antibiotic alternatives targeting resistant bacteria.</p>	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	Yes
