PART 1: Review Comments

	Reviewer's comment	Author's comment (If agreed with the reviewer, correct the manuscript and highlight that part in the manuscript. Authors must write his/her feedback here)
Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	Yes, it is. It is important to highlight the rare complications of the diseases and make sure it reach the clinicans so they keep it in mind and be able to provide the best medical care for patients.	
Is the title of the article suitable? Do you have any alternative Title in your mind?	Yes, it is. I think this title is suitable and should not be replaced.	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	Yes, it is.	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	Yes, it is.	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	The ABSTRACT is well displayed and summarized all the manuscript sections. The INTRODUCTION is good but the sentence "Thetendency for hyper coagulation but none of them is proven." Should be confirmed with at least one reference. The CASE REPORT included all required information, but the question mark after nodules and Dysplastic in in "multiple nodules? Dysplastic? regenerative." sentence should be removed. The DISCUSSION and CONCLUSION are good and comprehensive.	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	I suggest that they should be replaced with more recent ones. One of them dates back to 1968, in my opinion it is inappropriate since the acceptability of the information it provide might have been changed many times along with the ongoing researchs.
