**BPI Review Form 070520**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (If agreed with the reviewer, correct the manuscript and highlight that part in the manuscript. Authors must write his/her feedback here)
Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	<b>The manuscript is well written, it addresses the topic from a technical profile. Despite this, the focus on the topic is limited; e.g. the issue of transport safety is not considered, which means that the analysis is not complete, specially because it is about public safety.</b>	
Is the title of the article suitable? Do you have any alternative Title in your mind?	<b>the title should include the term Security COUL-2024 The Impact of Safe Transport Oriented Development on Public Realm and Accessibility: A Case of Gurugram</b>	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	<b>L'abstract may consider the topic on Safety (both private Safety and public Safety, with a focus on public transport security.</b>	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	<b>yes</b>	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	<b>The different sections are fine; however, there is a lack of discussion regarding Public Safety</b>	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	<b>in the Sections where the MARKET - INVESTMENTS - INFRASTRUCTURES are evaluated (investments, property values, etc.) those can be compromised or affected by the presence of any crime which can happen inside the subway and outside, in the surrounding neighborhood area. In fact, the lack of proper safety measures suggests a scenario in which crimes can be committed even inside the subway; just as the criminals are used to do, they can use the subway for their own activities, they can hide on themselves or carry anything they want with themselves, moving comfortably and taking advantage of the crowd to blend in. This means that the metro must be equipped with proper security; e.g. facial recognition AI devices (cameras), placed outside and inside the metro area, from binaries to the streets connected to the neighbourhood, that may be overviewed by both private and public police units. Crime must be discouraged, otherwise the value of the apartments and the market will definitely decrease.</b>	

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
