PART 1: Review Comments

	Reviewer's comment	Author's comment (If agreed with the reviewer, correct the manuscript and highlight that part in the manuscript. Authors must write his/her feedback here)
Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	Not useful.The article lacks scientific base and the impact of the IMNCI module if proved and used widely by many country. More over the title of the manuscript and the review collected are entirely different.	
Is the title of the article suitable? Do you have any alternative Title in your mind?	The title is not suitable because the literature selected for systematic review is based on the factors influencing implementation of IMNCI. The title can be 'Key factors influencing implementation of IMNCI - A systematic review'	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	Comprehensive.	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	Not suitable. 1. Grammar check need to be done 2. Spelling corrections 3. Use better scientific language.	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	1. Methods : The research method used in writing this article is systematic review, namely literature review is mentioned as method. Systematic review and literature review is entirely different and the Authors not followed the extensive methods in the systematic review. In the title it is mentioned literature review and methods systematic review which will confuse the readers. 2. In the table 1 Systematic review column 2 it is mentioned article summary, it could be the results of the study and in uniform format. 3. Article selected does not match the title of the study. 4. Discussions are done in two different headings such as IMCI implementation and The impact of IMCI implementation which is not related to the study literature selected for the review. The entire article should be revised before publication.	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	References are not matching the title of the study. Either the title must be changed or the new reviews suitable to the title should be done. The author has used different style of Citation of the reference in the article. Follow the journal guidelines to cite the reference.	

PART 2:
