| Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part. | <p>This manuscript makes a significant contribution to the scientific community by addressing the increasingly relevant issue of how chronic diseases impact attitudes toward aging among the elderly by providing valuable insights into the complex relationship between chronic disease prevalence and the psychological well-being of older adults, an area that is becoming more critical as the global population continues to age.</p> <p>I appreciate the manuscript's comprehensive approach to analyzing both the physical and psychological effects of chronic diseases, which can inform future strategies for promoting active aging and improving the quality of life for the elderly.</p> <p>However, the manuscript could benefit from <b>further clarification of the causal mechanisms and a more robust discussion on potential interventions</b>. Overall, the study presents important findings that could influence public health policies and initiatives aimed at supporting the elderly population.</p> |                                                                                                                                                             |
| Is the title of the article suitable? (If not please suggest an alternative title)                                                                                                                            | The title of the article, "The Impact of Chronic Diseases on Attitudes towards Aging among the Elderly," is suitable and effective. The research's focus is well communicated, which is essential for attracting the appropriate audience and establishing precise expectations. Overall, the title is appropriate, informative, and aligns well with the content of the manuscript.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                             |

|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| <p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>                                                                          | <p>The article's abstract is often comprehensive, offering a brief summary of the study's background, objectives, methodology, results, and conclusions. The text successfully outlines the significance of examining the impact of chronic illnesses on elderly individuals' perspectives on aging, including a comprehensive overview of the research.</p> <p>However, I suggest a few areas for improvement:</p> <ol style="list-style-type: none"><li><b>Clarification of Methods:</b> While the abstract mentions that the study is based on a review of previous literature, it could benefit from a more explicit description of the research methodology, such as how the data were collected and analyzed. This would provide readers with a clearer understanding of the study's approach and rigor.</li><li><b>Inclusion of Specific Findings:</b>it is suggested to use specific data or quantitative findings that highlight the severity of the negative effect of chronic diseases on aging attitudes by include elements such as percentages, statistical significance, or specific identified trends from the study.</li></ol> <p>Generally, although the abstract is well-organized and provides useful information, making these minor revisions could improve its clarity, effectiveness, and relevance to the target audience.</p> |  |
| <p>Are subsections and structure of the manuscript appropriate?</p>                                                                                                                                                                         | <p>The subsections and structure of the manuscript appear to be appropriately organized and logically flow from one section to the next.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| <p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.</p> | <p>The manuscript demonstrates scientific correctness and robustness through its thorough review of existing literature, which provides a solid foundation for understanding the relationship between chronic diseases and attitudes towards aging.In addition, the manuscript demonstrates thoroughness in its examination of how chronic diseases affect attitudes about aging. It provides a detailed knowledge of the physiological and psychological systems involved.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| <p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p> <p>-</p>                                                                                         | <p>The references in the manuscript appear to be both sufficient and carefully selected.</p> <p>However, there are a few considerations to ensure the references are as robust as possible:</p> <ol style="list-style-type: none"><li><b>Recent References:</b> Although the manuscript contains a combination of older and newer references, it is crucial to reflect the latest advancements in the subject. It is advisable to revise the literature by include more recent studies,</li><li><b>Additional References:</b>It is advisable to include current relevant research or comprehensive reviews that examine the effects of chronic diseases on attitudes towards aging. In addition, the manuscript could be enhanced by incorporating relevant policy papers or guidelines from health organisations, such as the World Health Organisation, that specifically address the topics of ageing and chronic diseases.</li></ol> <p>In summary, while the references are generally sufficient and relevant, ensuring the inclusion of the most recent research and a diverse range of sources could further strengthen the manuscript's foundation.</p>                                                                                                                                                                                         |  |

| Minor REVISION comments<br><br>Is the language/English quality of the article suitable for scholarly communications? | The language and English quality of the article are generally suitable for scholarly communication. The manuscript is written in a clear and formal academic tone, which is appropriate for a scholarly audience. The terminology used is precise and aligned with the standards expected in academic writing, particularly in the fields of gerontology and public health. |  |
| Optional/General comments                                                                                            |                                                                                                                                                                                                                                                                                                                                                                             |  |

PART 2:

|                                              |                                                                       |                                                                                                                                                                              |
