| Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.                        | The need to write this scientific work is caused by interest in business ethics, which is one of the priority areas of economics and management of enterprises, the basis of the innovative component of their sustainable development, competitiveness and integration into the world economy. It is obvious that the author has studied a lot of factual material aimed at understanding the problems of business ethics in organizations. At the same time, a content analysis of modern scientific discourse in the area of the proposed topic allows us to identify a very small number of works devoted specifically to the understanding of business ethics as the most complex global task for the development of organizational culture and social responsibility of modern enterprises. There is a lack of appropriate attention to the intellectual potential of human values, such as: differences in ability and education; difference in professional tastes and goals; social, gender and ethnic differentiation; ability to make decisions and willingness to take risks, etc. These factors do not allow the enterprise to properly use additional reserves to improve operating efficiency. Such an additional reserve is the activity of forming the foundations of business ethics at the enterprise and supporting the development of organizational culture, as the driving force for increasing the labor productivity, as well as the efficiency of the enterprise as a whole. This emphasizes the relevance and scientific significance of the work proposed by the author. |                                                                                                                                                             |

| Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part. | The work consists of 6 subsections (including conclusions), in which the goals emphasized in the work are consistently revealed. The presentation style confirms the high scientific level of the author. The author's well-founded and convincing proposals for using the BESQ scale in the study of business ethics to ensure the quality of management in organizations are worthy of attention. Along with the generalpositive assessment, the author should pay attention to the following comments and points of discussion:1) in op. II (Establishing Ethics), in addition to the prescribed main and secondary goals, it is necessary to reveal the main tasks of the work;2) in op. III (Research Methodology) it is advisable to pay attention to the fact that the section describing the methodology is the most important part of scientific research; therefore, the description of the research methods used                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                             |
