

Review Form2

Book Name:	Contemporary Research and Perspectives in Biological Science
Manuscript Number:	Ms_BPR_2505
Title of the Manuscript:	Colour and Morphometric Characteristics of Ukerewe and Bunda Indigenous Cattle Populations in the Lake Victoria Basin, Tanzania
Type of the Article	Book chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer’s comment	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	This manuscript informs us about the characteristics of cattle populations in Tanzania. it constitutes an essential step in the knowledge of cattle in this area of Africa	
Is the title of the article suitable? (If not please suggest an alternative title)	The proposed title is quite explicit and fits well with the results described in the manuscript	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The proposed summary is quite concise. However it will be necessary to propose a percentage at the sentence: A considerable proportion of cattle in this study had small sized dewlaps and navel flaps (????%)	
Are subsections and structure of the manuscript appropriate?	The proposed subsections are well structured	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.	A fundamental step in understanding animal populations is the description of morphological characteristics. In this sense, phenotypic characterization is used to identify and document diversity within and between distinct breeds, based on their observable attributes. After this step, other levels of characterization of animal breeds can be used.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	An effort has been made by the authors to use as much as possible the most recent authors who have worked in the same direction as them.	

Review Form2

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The quality of the language and English of the article is suitable for scientific communications	
Optional/General comments	The manuscript as it stands provides interesting scientific information to better understand the cattle breeds in Tanzania.	

PART 2:

	Reviewer’s comment	Author’s comment(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
