PART 1: Review comments

REVIEW comments <u>required</u>	Reviewer's comment	Author's comments <i>(Please correct the manuscript and highlight this part of the manuscript. It is mandatory for authors to write their comments here)</i>
Please write a few sentences regarding the importance of this manuscript to the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3 to 4 sentences may be required for this part.	- The review on this work has not been sufficiently summer exploited - He would be very wise to show the macroscopic images on a agar and microscopic studies of indexed fungi - It is necessary to present in this work, the images of some symptoms of the disease Alzheimer's reaching people - It is necessary to include figures in the introduction to attract readers ' attention to this disease	
Is the title of the article appropriate? (If not, please suggest an alternative title)	The title of this work is correct	
Is the article summary complete? Do you propose the addition (or deletion) of certain points in this section? Please write your suggestions here.	The summary is correct	
Are the subsections and structure of the manuscript appropriate?	Subsections are not complete - You must present the illness Alzheimer's in general - Show the causes first and then talk about fungal origins - Talk about the consequences and attempted solutions	
Please write a few sentences regarding the scientific accuracy of this manuscript. Why do you think this manuscript is scientifically sound and technically sound? A minimum of 3 to 4 sentences may be required for this part.	This manuscript is not scientifically solid because some elements that I have are missing mentioned above - He goes to need better explain this concept " The pathogenesis of AD involves Tau protein aggregation and the formation of neurofibrillary tangles"	
Are the references sufficient and recent? If you have suggestions for additional references, please mention them in the evaluation form.	As I have said sometimes , the review on this work did not sufficiently summer exploited	

Review Form 2

comments on <u>REVIEW</u> Is the language/English quality of the article suitable for scientific communications?	The quality of the language is suitable for this work	
<u>Optional/General</u> comments
