

Review Form2

Book Name:	Disease and Health Research: New Insights
Manuscript Number:	Ms_BPR_2437
Title of the Manuscript:	Knowledge And Compliance With Standard Precautionary Measures Among Nurses In Madonna University Teaching Hospital,Elele,Rivers State
Type of the Article	Book chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	I liked the manuscript due to its importance in Health care settings. Because the Non compliance with Standard precaution could lead to excessive burden on the health care settings. Furthermore, it further increase the risk of health care associated infections in the health care professionals and it can further pose risk to their family members (If Not diagnosed).	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is Suitable to the study been conducted.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Overall Abstract is good, But I would suggest to change the full name of the hospital to the Abbreviation. As for the first time, the author mention the abbreviation, then it can be used for the whole abstract. Need little consistency for the use of abbreviation or Full form.	
Are subsections and structure of the manuscript appropriate?	Yes. The structure is appropriate. But I would like to suggest that the Content Validity Data should be added , as already done.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.	Yes. The article covered each aspect very clearly. But I am not sure, How it could be generalized to the whole population of the country, As the study only covered the nurses of a single hospital. For further generalizability, I think, this study could include other hospital as well for generalizability. Moreover, In addition to it, I would like to suggest that this study could add the other Health Care professionals (Doctors, Health Care Assistants, Technicians etc) who are also directly involved in the patient care. Because their knowledge and compliance is also important to be assessed.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	The references are sufficient but not recent, As I did not found any reference within 10 years. For the Literature review, these references should be within 10 years. Moreover, multiple recent studies have been conducted on Standard precautions, I would suggest to use the recent references. Below are some of the references. 1. Hessels, A. J., & Larson, E. L. (2016). Relationship between patient safety climate and standard precaution adherence: a systematic review of the literature. <i>Journal of Hospital Infection</i> , 92(4), 349-362. 2. Beyamo, A., Dodicho, T., &Facha, W. (2019). Compliance with standard precaution practices and associated factors among health care workers in Dawuro Zone, South West Ethiopia, cross sectional study. <i>BMC health services research</i> , 19, 1-6. 3. Akagbo, S. E., Nortey, P., &Ackumey, M. M. (2017). Knowledge of standard precautions and

	barriers to compliance among healthcare workers in the Lower ManyaKrobo District, Ghana. <i>BMC research notes</i>, 10, 1-9. 4. Sarani, H., Balouchi, A., Masinaeinezhad, N., &Ebrahimitabs, E. (2016). Knowledge, attitude and practice of nurses about standard precautions for hospital-acquired infection in teaching hospitals affiliated to Zabol University of Medical Sciences (2014). <i>Global journal of health science</i>, 8(3), 193. 5. Jael, S. A., Maristela, T. A. E., Alano, J. C. R., Wushoma, W. T., &Jumarang, T. A. L. (2019, December). Awareness and Practice of Standard Precaution for Infection Control among Student Nurses. In <i>Abstract Proceedings International Scholars Conference</i> (Vol. 7, No. 1, pp. 417-133). Moreover, In addition to the statement highlighted above, The author need to be consitant with the Refrencing style, As the author used multiple referencing style. Which need to be consistant with the journal requirement.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	No any issue regarding English or language Observed.	
Optional/General comments	Overall, the manuscript is good to be published. Just need Minor correction. Furthermore, The suggestion are added to each column accordingly	

PART 2:

	Reviewer's comment	Author's comment(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
