

Review Form2

Book Name:	Pharmaceutical Research: Recent Advances and Trends
Manuscript Number:	Ms_BPR_2556
Title of the Manuscript:	Phytosome: A promising therapeutic approach as nanomedicine
Type of the Article	Book chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer’s comment	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	Phytosomes are newer drug delivery system quite different from a traditional one.However its applications are still under scanner and wider research are still required to prove its effectiveness in different types of diseases.Biactive plant materials which are hydrophilic may not penetrate the biological barrier owing to its lipophobicnature,thus comprehensive study on this drug delivery system is extremely necessary in pharmaceutical science.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes the abstract is satisfactory.	
Are subsections and structure of the manuscript appropriate?	In subsection more emphasis need to be given on mechanism of drug penetration through the biological barriers of the body.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.	This manuscript tries to explain the effectiveness of phytosomes in delivering the hydrophilic drug particles to the tissues.However the mechanism of penetration and the compatibility of the liposomes to the cell membrane need to be explained further.Limitations of liposomes also needs to be emphasized.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Most of the references are within the past period of 10 years,so it is preferable.	

Review Form2

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	English is satisfactory.	
Optional/General comments	Mechanism of action by which the liposomes cross the biological barriers need to be explained further.	

PART 2:

	Reviewer’s comment	Author’s comment(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
