

Review Form2

Book Name:	Medicine and Medical Research: New Perspectives
Manuscript Number:	Ms_BPR_2260
Title of the Manuscript:	ROLE OF ANTEROLATERAL KNEE LIGAMENT FOR RECONSTRUCTIVE SURGERY
Type of the Article	Book chapter

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	This manuscript enhances our understanding of the anterolateral ligament (ALL) by providing crucial anatomical insights that have led to its inclusion in ACL reconstruction. Addressing both ACL and ALL injuries is shown to prevent complications and improve patient outcomes, marking a significant advancement in orthopaedic surgery. The study also offers valuable data for refining surgical techniques and medical education.	
Is the title of the article suitable? (If not please suggest an alternative title)	No, the title of the article is not suitable. I suggest, "Morphologyof Anterolateral ligament: A Cadaveric study and its Implications for knee reconstructive surgery"	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Very comprehensive	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.	The manuscript is scientifically reliable because of its careful cadaveric dissection and precise measurement of the anterolateral ligament (ALL). The results match existing studies, confirming the accuracy and importance of the data. This research provides useful insights into the ALL's role in knee stability and is relevant for both medical practice and education.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
<u>Minor</u> REVISION comments	Yes	
Is the language/English quality of the article suitable for scholarly communications?		
<u>Optional/General</u> comments		

Review Form2

PART 2:

	Reviewer's comment	Author's comment(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
