PART 1: Review Comments

Compulsory REVISION comments	Reviewer’s comment	Author’s Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	Postspinal headache is one of the most distressing complication following spinal anesthesia. If diagnosed early and treated, it can be managed thereby reducing the morbidity and patient dissatisfaction. This manuscript highlights a very important topic which needs to be discussed.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suggestive as if we should be conscious while treating PSH and our treatment may have some side effects. It would be better to change the title.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract looks good but the keywords are not arranged alphabetically	
Are subsections and structure of the manuscript appropriate?	The subsections are well structured and explained in details However, discussion section could be made better with addition of contents regarding PSH rather than the hospital protocols	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.	Few grammatical errors and font errors are there which need to be corrected. Other treatment options like sphenopalatine ganglion block could be added. Could add more regarding epidural blood patch	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are sufficient and recent but few things regarding epidural blood patch and sphenopalatine ganglion block can be added	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Needs some grammatical corrections
