Manuscript Number:	Ms_BPR_2453
Title of the Manuscript:	Beware while Treating Post-Spinal Headache!
Type of the Article	Book chapter

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	Post spinal headache (PSH) is the frequent inmost cases transient but sometimes debilitating complication of neuroaxialanesthesia. This complication dramatically affects postpartum period. Therefore knowledge of this symptoms, earlier recognition and treatment is mandatory. This is a review article which highlights different aspects of PSH in obstetric practice and is very interesting for both obstetricians and anesthesiologists.	
Is the title of the article suitable? (If not please suggest an alternative title)	Title of the article is suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstarct of the article is comprehensive	
Are subsections and structure of the manuscript appropriate?	Subsections and structure of the manuscript are appropriate	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.	Authors reviewed different aspects of PSH: pathophysiology, definition, diagnosis, signs and symptoms, differential diagnosis, red flags, blood patch, outcome and follow-up. Therefore by this review reader can completely understand the problem. Although epidural blood patch is a gold standard of PSH treatment, it will be reasonable to review other treatment options too (for example, sphenopalatine ganglion block) but it is not diminishes the importance of this article.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	References are sufficient and recent	

Review Form2
