

Editor's Comment:

I accept the mentioned manuscript for publication in the BP International.

Considering the reviewers comments and authors corrections, we can publish this manuscript. The reasons are as follows:

- 1- One reviewer gives comment such as "The title promises insights into the dynamic processes and conditions within the nebula that eventually led to the birth of our sun and its planetary system"
- 2- Two reviewers give comments such as "Accept after minor revision".

According to the comments, the authors have corrected the manuscript carefully. Therefore, the manuscript has enough value for publication in the BP International.
