

Review Form2

Book Name:	Science and Technology - Recent Updates and Future Prospects
Manuscript Number:	Ms_BPR_2061
Title of the Manuscript:	Behavioral approaches for Sustainable Mobility patterns in Physically Active University Students
Type of the Article	Book chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	The manuscript makes a significant contribution to the scientific community by addressing the behavioral aspects of sustainable mobility among University Students, particularly focusing on gender differences in physical activity. This research is timely and relevant, shows increasing emphasis on sustainable practices in urban environments and the role of education in shaping future behaviors. The findings inform about policy-making and educational programs aimed at promoting active transportation, making it a valuable resource for researchers and practitioners in the fields of urban planning, public health and education.	
Is the title of the article suitable? (If not please suggest an alternative title)	The given title is appropriate as it reflects the core focus of the study on sustainable mobility practices among physically active University Students. A more descriptive title can also enhance clarity. Suggested alternative Title: "Exploring Gender Differences in Sustainable Mobility Practices Among Physically Active University Students in Serres, Greece."	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract of the Article provides a general idea of the study's objectives, methodology and key findings. Author(s) can provide the implications of the findings for policy and practice. Adding a sentence that highlights how the results can inform strategies for promoting sustainable mobility among students is expected.	
Are subsections and structure of the manuscript appropriate?	Yes.The logical flow from introduction to methodology, results and discussion adds tothe readability. Author(s) can mention a brief summary of the key findings at the end of the introduction to provide context for the readers.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.	The manuscript demonstrates scientific rigor through its use of established methodologies such as the Theory of Planned Behavior (TPB) framework and appropriate statistical analyses. The reliability of the questionnaire is confirmed with Cronbach's α values, indicating a robust approach to data collection. Furthermore, the study's focus on gender differences adds depth to the analysis, making it a comprehensive examination of the topic. Overall, the manuscript is scientifically sound and contributes valuable insights to the field.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	They are sufficient. Author(s) canalsoinclude more recent studies on sustainable mobility and physical activity, particularly those published in the last 2-3 years, to ensure the literature review reflects the latest developments in the field.	

Review Form2

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes. It is suitable for scholarly communication. Author(s) should take care of phrasing and grammatical errors through a thorough proofreading. This enhances clarity & professionalism.	
Optional/General comments	On the whole, the manuscript is a valuable contribution to the literature on sustainable mobility and physical activity and with minor revisions, it has the potential to make a significant impact in the field. The manuscript is well-researched and presents valuable findings, but revisions are needed to improve the overall clarity and deal with language issues.	

PART 2:

	Reviewer's comment	Author's comment(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
