

Review Form2

Book Name:	Medicine and Medical Research: New Perspectives
Manuscript Number:	Ms_BPR_2592
Title of the Manuscript:	Future Applications of Intravesical SCL Gene Transfer for the Treatment of Diabetic Neurogenic Bladder
Type of the Article	Book chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer’s comment	Author’s Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	DCP is considered as non reversablediapeticcomplication , so medical trial to treat such disorder is valuable and give hope to patients to regain the normal bladder activity and so normal urination process Beside that DM no considered as common global disease and have a lot of complications I strongly like this topic	
Is the title of the article suitable? (If not please suggest an alternative title)	Correct Transfer for – then Neurogenic bladder include all disorders related to nervous systems and DCP is just one of them , so better to be specific Future application of intravesical SCL gene transfer for the treatment of diapeticcystopathy or neuropathy	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Add to key words : c-KIT , ICCs , Add muscle to detrusor – If previous workup mentioned to strength the abstract	
Are subsections and structure of the manuscript appropriate?	Reasonable	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.	With the development of laboratory molecular technology , the application of such trial will be possible to be applied and open new doors for treatment of noising complications This article considered as spot light to researchers to continue on applying this technique	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	All the reference are 10+ years Better to add recents references	

Review Form2

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Language was good	
Optional/General comments	Need to add more previous studies relevant to this topic	

PART 2:

	Reviewer's comment	Author's comment(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
