| Manuscript Number:       | Ms_BPR_2626                                                                                                             |
| Title of the Manuscript: | Pathogen detection on inanimate surfaces in healthcare institutions: Phenotype incubation methods and molecular methods |
| Type of the Article      | Book Chapter                                                                                                            |

PART 1: Review Comments

| Compulsory REVISION comments                                                                                                                                                                                                         | Reviewer’s comment                                                                                                                                                                                                                                         | Author’s Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.                        | After reading the paper, it is clear that the paper focus on phenotypic and molecular methods of detection of pathogens from healthcare institutions. The content provides detailed information about the methodologies used for detection.                |                                                                                                                                                             |
| Is the title of the article suitable? (If not please suggest an alternative title)                                                                                                                                                   | Yes,the topic is relevant with the content provided in the article.                                                                                                                                                                                        |                                                                                                                                                             |
| Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.                                                                          | The abstract provides information of the content of the article.                                                                                                                                                                                           |                                                                                                                                                             |
| Are subsections and structure of the manuscript appropriate?                                                                                                                                                                         | Yes.                                                                                                                                                                                                                                                       |                                                                                                                                                             |
| Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part. | The scientific inclusion of some topics must be done after reviewing the article and the conclusion needs to be elaborated showing relevance of the topic with present scenario The reference to every table must be provided to make it more explanatory. |                                                                                                                                                             |
| Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.                                                                                                  | The references provided must be in specified format and should be clear about the method of detection methods mentioned in the article.                                                                                                                    |                                                                                                                                                             |
