

Review Form2

Book Name:	Science and Technology - Recent Updates and Future Prospects
Manuscript Number:	Ms_BPR_1855
Title of the Manuscript:	Amoco CD Commercial Polypropylene Catalyst Tailor-Made for the Amoco-Chisso Gas Phase Process. Organotitanium Complex Coordinated on MgCl₂
Type of the Article	Book chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	The manuscript is marvelous in the scientific community. I like the manuscript due to the potential applications of the field. Organometallic complexes have a wide range of commercial applications due to their unique chemical properties. They are essential in industrial catalysis, fine chemical synthesis, medicine, materials science, agriculture, energy, and environmental applications.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the paper should be adjusted to one sentence, normally title contain one sentence. I suggest that the title should be like this if possible: Organotitanium Complex Coordinated on MgCl₂ for the Amoco-Chisso Gas Phase Process: Tailor-Made Amoco CD Commercial Polypropylene Catalyst.	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	There is no proper introduction in the abstract, there is need for the author to introduce a brief concept of organometallic complexes, examples, applications.The aim of the manuscript should be re-write again and should clear and diminutive. The abstract most contains atleast five to above keywords.	
Are subsections and structure of the manuscript appropriate?	The subsections and structure of the manuscript are not appropriate, there is need for the author to re-write the subsections and should be number e.g 1. Introduction, 2. Experimental Section, 2.1 Materials, 2.2 Material Synthesis, 3. Results and Discussion, 4. Conclusion The structure of the manuscript should be logical and sequentially.	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound?Minimum 3-4 sentences may be required for this part.	The manuscript is scientifically and technically significant, because organometallic complexes have a wide range of commercial applications due to their unique chemical properties. They are essential in industrial catalysis, fine chemical synthesis, medicine, materials science, agriculture, energy, and environmental applications. So conducting research in this area is quite crucial.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. :	The references are not sufficient and recent, the author should add more up to date references. Some references are not cited in main text of the manuscript. APA style of references should be adopted. Find some suggested additional references below: 1. Mudi S. Y., Usman M. T., and Ibrahim S. (2015). Clinical and Industrial Application ofOrganometallic Compounds and Complexes:A Review. American Journal of Chemistry and Applications 2(6): 151-158 Published online January 5, 2016(http://www.openscienceonline.com/journal/ajca) ISSN: 2381-4527 (Print); ISSN: 2381-4535 (Online). 2. Sigel, A., Sigel, H., and Sigel, R.K.O. (2010). Organometallicsin environment and toxicology. Metal ions in life sciences 7.Cambridge: RSC Publishing. ISBN 978-1-84755-177-1.

Minor REVISION comments Is language/English quality of the article suitable for scholarly communications?	The manuscript requires revision with respect to the language/English quality used for proper and scholarly communications. I therefore suggest that, the author ask a native English speaker or equivalent to assist him with correcting the spelling, grammar, word use, and punctuation throughout your manuscript.	
Optional/General comments	Basically, the technicality and content of this manuscript is well explained but the sentences and paragraphing have to be check and corrected accordingly. But tables, graphs, figures or charts in the content of the manuscript should be draw accordingly not cropping.	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
