Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	This article addresses an important public health issue related to hygiene practices among students in Islamic boarding schools, particularly in Indonesia. This research makes a significant contribution as it highlights the factors influencing personal hygiene behaviors and their impact on the health of students in often underserved health environments. The article is relevant to the scientific community as it provides insights into interventions that can improve health quality in Islamic boarding schools, institutions that play a crucial role in Indonesian society.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title is appropriate and accurately reflects the content and main focus of the research.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, the abstract is comprehensive, but it could be improved by adding more details regarding the methods and main findings of the research. For instance, it could more clearly state the type of statistical analysis used and the key results obtained.	
Are subsections and structure of the manuscript appropriate?	Yes, the structure and subsections of the manuscript are appropriate and provide a clear flow of information from the introduction to the conclusion.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimumof 3-4 sentences may be required for this part.	This manuscript is scientifically robust and technically sound. The data collected has been analyzed using appropriate methods, and the results provide meaningful insights into the factors affecting the health of students in Islamic boarding schools. However, the authors need to ensure that all claims are adequately supported by data and that there is consistency in the presentation of the data.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references used are sufficient and recent, but the authors might consider adding some more recent studies related to health issues in Islamic boarding schools to strengthen the background of the research.
