

Review Form2

Book Name:	Disease and Health Research: New Insights
Manuscript Number:	Ms_BPR_2256
Title of the Manuscript:	Enhancing Health Quality of Islamic Boarding School Students through Hygiene Practices in Depok and Banten, Indonesia
Type of the Article	Book Chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimumof 3-4 sentences may be required for this part.	The importance of this study to the community: The study raises awareness about the critical role of hygiene in preventing disease outbreaks in communal living environment especially among boarding school students. By identifying factors that influence personal hygiene practices in Islamic boarding schools, this study helps in reducing the prevalence of infectious diseases such as scabies, hives, and diarrhea. However, you could emphasize the gap in research that this study addresses. Why is it important to compare rural and urban Islamic boarding schools, specifically in terms of hygiene practices?	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable but I have suggestion to be considered : 1) Enhancing Hygiene Practices for Improved Health in Islamic Boarding Schools: A Comparative Study in Depok and Banten. 2) Promoting Hygiene and Health in Islamic Boarding Schools: A Comparative Study of Rural and Urban Settings	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Overall, the abstract is well-structured and conveys the essential information about the study. Expanding on some of the details, particularly the significance and context, would strengthen its impact. Suggestion to include the following : 1) mention of data collection through interviews and questionnaires could be expanded slightly to explain what areas these methods focused on (e.g., attitudes, knowledge, behavior related to hygiene practices). 2) mentioning of the type of infectious diseases 3) explaining how these findings could contribute to better health interventions or policy development in Islamic boarding schools	
Are subsections and structure of the manuscript appropriate?	The structure and subsections of the manuscript seem logical and appropriate for the study's objectives. However, best to change section 'Findings' to "Result" Some suggestion to strengthen the manuscripts, 1) In Introduction, focus on why this particular study is needed in the context of current public health efforts. 2) could be improved by explaining why these specific methods were chosen and how they relate to the research questions.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically	The manuscript's scientific rigor comes from its clear research focus, robust theoretical grounding, appropriate methodology, statistical analysis, and policy relevance. These elements ensure that the study contributes meaningfully to the understanding of personal hygiene	

Review Form2

robust and technically sound? A minimum of 3-4 sentences may be required for this part.	practices in Islamic boarding schools However some suggestion to strengthen the manuscripts, 1) In Introduction, focus on why this particular study is needed in the context of current public health efforts. 2) could be improved by explaining why these specific methods were chosen and how they relate to the research questions. 3) In Literature review, consider integrating more recent studies on health practices and hygiene in religious schools, both in Indonesia and globally, to broaden the relevance of your research 4) In methodology, how were the interviews conducted? Were there any biases in the purposive sampling that could affect the results? 5) In discussion , how could your research influence changes in the management of health programs at Islamic boarding schools?	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References is sufficient but lack of recent references. At least recent 5 years to be added on the list of references	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes, suitable but require some revision.	
Optional/General comments	1) Spelling error has found. 2) The article is generally clear and informative, but certain sections could benefit from a more formal tone and clearer phrasing. 3) Some sentences are a bit lengthy and could be broken up for easier reading. 4) The passive voice is prevalent, which is acceptable in scientific writing but should be balanced with active voice where possible for clarity.	

PART 2:

	Reviewer's comment	Author's comment(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
