| Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part. | It is a very good guide to the scientific audience and a good tool for reviewing one's own work and practices. It can also work as a reference piece in Clinical supervision and for discussing case reviews. Also good for students to learn to document case histories for consistency's sake.                |  |
| Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.                                                                                                   | Yes, very good.                                                                                                                                                                                                                                                                                                 |  |
| <u>Minor REVISION</u> comments<br><br>Is the language/English quality of the article suitable for scholarly communications?                                                                                                           | Very good. Clear and easy to understand                                                                                                                                                                                                                                                                         |  |
