PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(If agreed with the reviewer, correct the manuscript and highlight that part in the manuscript. Authors must write his/her feedback here)</i>
Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	Yes, employment based contingency is a potentially important outcome determinant for persons with substance use disorders.	
Is the title of the article suitable? Do you have any alternative Title in your mind?	No, the title is suitable.	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	The abstract is comprehensive.	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	Yes, it is suitable	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	The methods section lacks explicit mention of substance use disorder in the inclusion criteria (if they were to be applied as is, then non-substance use disorder studies would also have been included). The reasons of not assessing publication bias, not doing quality assessment and not doing a meta analysis should be mentioned. The table 1 presents some of the studies with the number of participants in the control group, while some of the studies are not presented with the number of participants in the control group. The limitations may include limitations of the databases and keywords in search, and the lack of meta analysis.	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	Yes
