

Review Form2

Book Name:	Research Advances in Environment, Geography and Earth Science
Manuscript Number:	Ms_BPR_1833
Title of the Manuscript:	Climate Changes in Iraq: The Causes and Solutions
Type of the Article	Book Chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer’s comment	Author’s Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	I consider that it is not a manuscript for the scientific community, there is a lack of data and the writing needs to be improved. The topic is important, but information is lacking.	
Is the title of the article suitable? (If not please suggest an alternative title)	No, because it is not a climate change study, there are 2 graphs of CO2 emissions, so the title could be "CO2 emissions from industrial sources... and their possible solutions" Information is missing from the graphs, It does not say where they were obtained from and it is important.	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	No, In a scientific work it must have an order and it is only an informative note. Although there is the introduction, the methodology, results, discussion and conclusions are missing. That is, there is no order of the topic.	
Are subsections and structure of the manuscript appropriate?	The structure of the manuscript has no order and is not understood, there is confusion on the subject. The discussion is related to other case studies of the topic being analyzed.	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound?Minimum 3-4 sentences may be required for this part.	The manuscript lacks a review of scientific publications that support the study of greenhouse gas emissions. They don't have a goal and it gets confusing, it's just an information sheet.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. :	The references that are in the manuscript are news. Also, a quote should not be from Wikipedia, I suggest you review primary information. I reviewed information related to the topic and found the following: • The Chemical Behaviour of Greenhouse Gases and its Impact on Climate Change in Iraq • Evidence of Climate Change in Iraq • Climate Change: Consequences on Iraq's Environment • Impact of carbon dioxide concentrations on atmospheric temperature changes over Iraq and some neighboring countries	

Review Form2

Minor REVISION comments Is language/English quality of the article suitable for scholarly communications?	English language review required	
Optional/General comments		

PART 2:

	Reviewer’s comment	Author’s comment(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
