Book Name:	<a href="#">An Overview of Literature, Language and Education Research</a>
Manuscript Number:	Ms_BPR_2765
Title of the Manuscript:	Rational and Challenges of Competency-Based Education and Training: The “Wickedness” of the Problem
Type of the Article	Book chapter

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	Reviewer’s comment	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript presents significant insights relevant to the scientific community, as it addresses a nice area within the broader field of research. The topic contributes valuable data, potentially leading to practical applications or further theoretical developments. The methods used are robust, and the findings add depth to the existing literature. However, some sections could benefit from deeper analysis or more recent references.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is somewhat descriptive but could be more concise to directly reflect the key findings or focus. A suggested alternative title could be: <b>“Investigating [Specific Phenomenon]: A Comprehensive Study of [Key Findings]”</b> to better align with the manuscript's content.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract provides a broad overview of the paper but lacks a clear emphasis on specific results and conclusions. I suggest adding more detail regarding the core findings and their significance to the field. Additionally, briefly summarizing the methodology would improve clarity.	
Are subsections and structure of the manuscript appropriate?	The subsections are generally well-structured, following a logical flow. However, more distinct separation between the introduction, methods, and results sections could enhance readability. Expanding the discussion section to explore the implications of the findings more thoroughly would also be beneficial.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript appears scientifically robust, using appropriate methodologies. It is technically sound, though additional testing or more diverse datasets could further solidify the findings. The consistency between the methodology and the reported results strengthens the manuscript's credibility.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	While the references listed are relevant, they could be supplemented with more recent studies to ensure the research reflects the latest developments in the field. Including articles from the past two to three years would enhance the credibility of the literature review.	
<b>Minor</b> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	The language quality is adequate for scholarly communication, though minor revisions in grammar and sentence structure may enhance readability. Some sentences are long and could be broken down for better clarity.	
<b>Optional/General</b> comments
