Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript is good. Language is concise and to the point. Grammar is good with no flows. I only find that the range of research 2020 and 2021 is short and the number of articles reviewed (12) is not enough to perform an impact. However, scientific writing and rationale are reasonable.

Since this is a worldwide problem and has captured the lives of huge number of people at the time of emergence, following vaccine efficacy is very important to prevent more mortalities in cases of outbreaks.
